1. Applicants' amendment filed 5/2/05 has been entered. This amendment overcomes the prior art rejection for reasons consistent with that noted in the previous office action. Upon a final review of the claims, a new ground of rejection was noted by the Examiner. During a telephone conversation with Burton Amernick on 5/13/05 this issue was raised, but the Examiner and attorney could not agree on a resolution. As such the following new ground of rejection is made. The Examiner apologizes for not making this rejection previously.

2. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Reference to "the halogen terminated vinyl polymer" lacks antecedent basis. In addition, this claim is confusing since converting a halogen terminated vinyl polymer to a silyl containing substituent is a different process than the process required by instant claim 13, wherein a poorly polymerizable alkenyl group is added to form residual alkenyl groups which are subsequently hydrosilylated to result in a silyl containing substituent. The Examiner draws attention to page 29, lines 14 to 25, of the specification which indicates that these processes are separate and different means of obtaining a silyl terminated polymer.

3. Claims 13 to 19, 21, 22 and 27 are allowed.
